

ALEXANDER PIERCE - RESUME

ALEXANDER PIERCE

Email: alexander.pierce@email.com | Phone: (555) 234-5678 | GitHub: github.com/apierce-dev

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of hands-on experience building web applications, database architectures, and machine learning pipelines. Experienced in full-stack development, algorithms, and agile software development workflows.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C++, SQL, JavaScript, HTML, CSS
- Frameworks & Tools: Git, GitHub, Machine Learning, Artificial Intelligence, Data Structures, Algorithms

PROFESSIONAL EXPERIENCE

Software Development Engineer | NexaTech Solutions (2022 - Present)

- Developed scalable backend microservices using Python and SQL, handling 1M+ daily request payloads.
- Implemented machine learning algorithms for predictive user behavior analysis, improving recommendation accuracy by 28%.
- Led version control workflows using Git and GitHub, establishing CI/CD deployment pipelines for cloud infrastructure.
- Designed responsive user interfaces utilizing JavaScript, HTML, and CSS.

Junior Software Developer | CodeCraft Innovations (2021 - 2022)

- Built automated data scraping and cleaning pipelines with Python and SQL.
- Optimized core algorithm efficiency, reducing search query latency by 40%.

EDUCATION

Bachelor of Science in Computer Science | Metropolitan University (2017 - 2021)

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Artificial Intelligence, Machine Learning.
